

# Amazon Rainforest Bldg

Brandywine Zoo, Delaware, USA

Area: 9,000sf

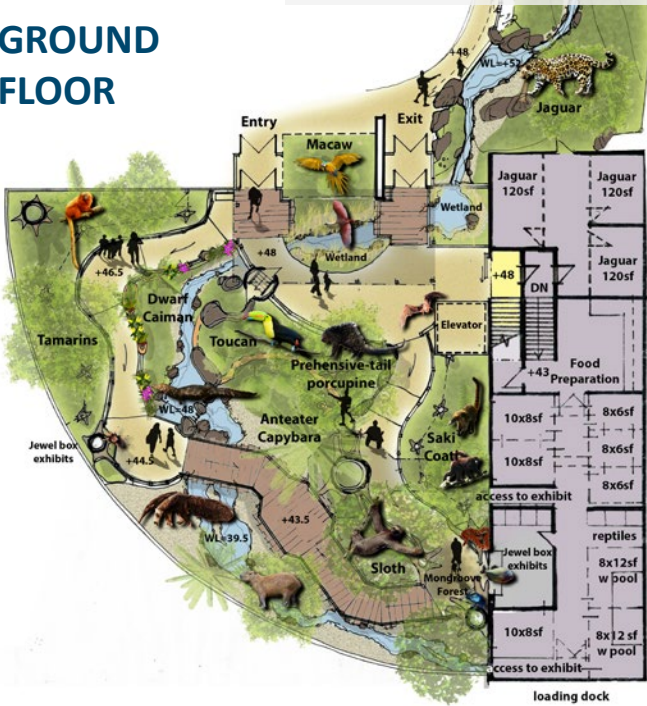

Budget: \$10 million

Animals: Macaw, Tamarins, Dwarf Caiman, Toucan, Ant-eater, Capybara, Porcupine, Sloth, Saki, Coati, Jaguar, ...

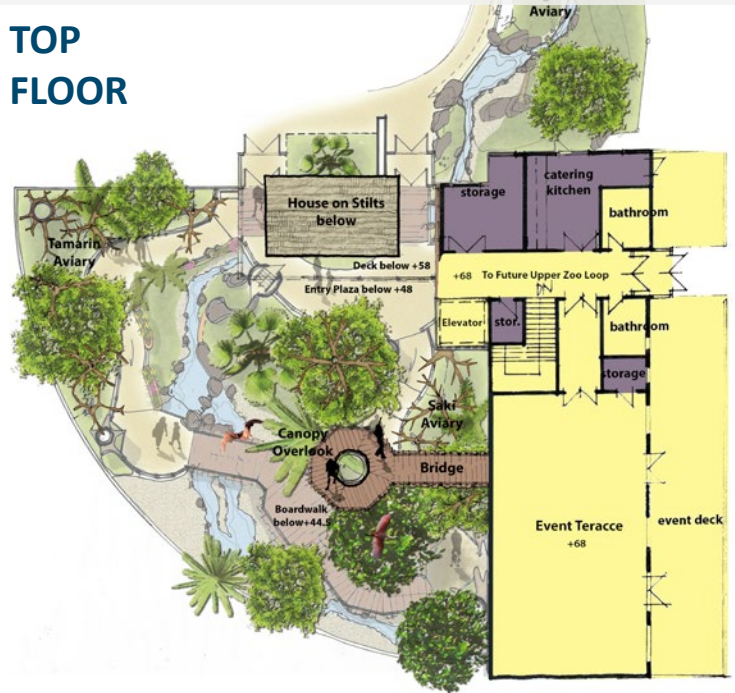

Zoo Design Inc. in collaboration with GWWO Architect are working on a 9000sf indoor rainforest habitat, a major expansion to The Brandywine Zoo. The new three story building will feature three different habitats: riverine, forest ground, and canopy level; several mixed species exhibits and many free flying birds. Event space on the third level overlooking the rainforest canopy, with stunning views of Brandywine Park and Brandywine River, is a promising revenue generating feature.
