

Wolf Habitat

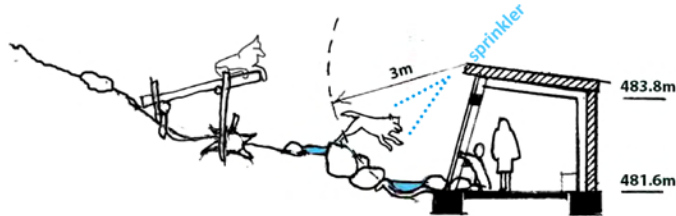

Zoo Jihlava, Czech Republic

Animal Area: 1.5 acres

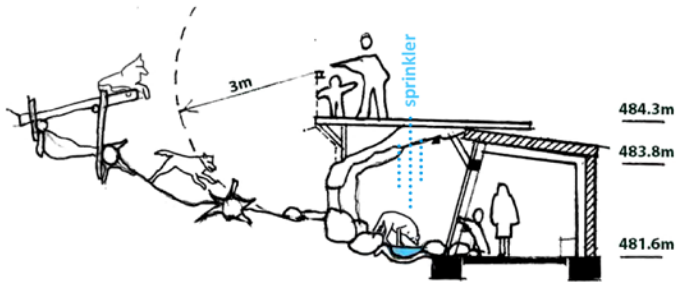

Animals: Wolves

View Shelter: Phase I

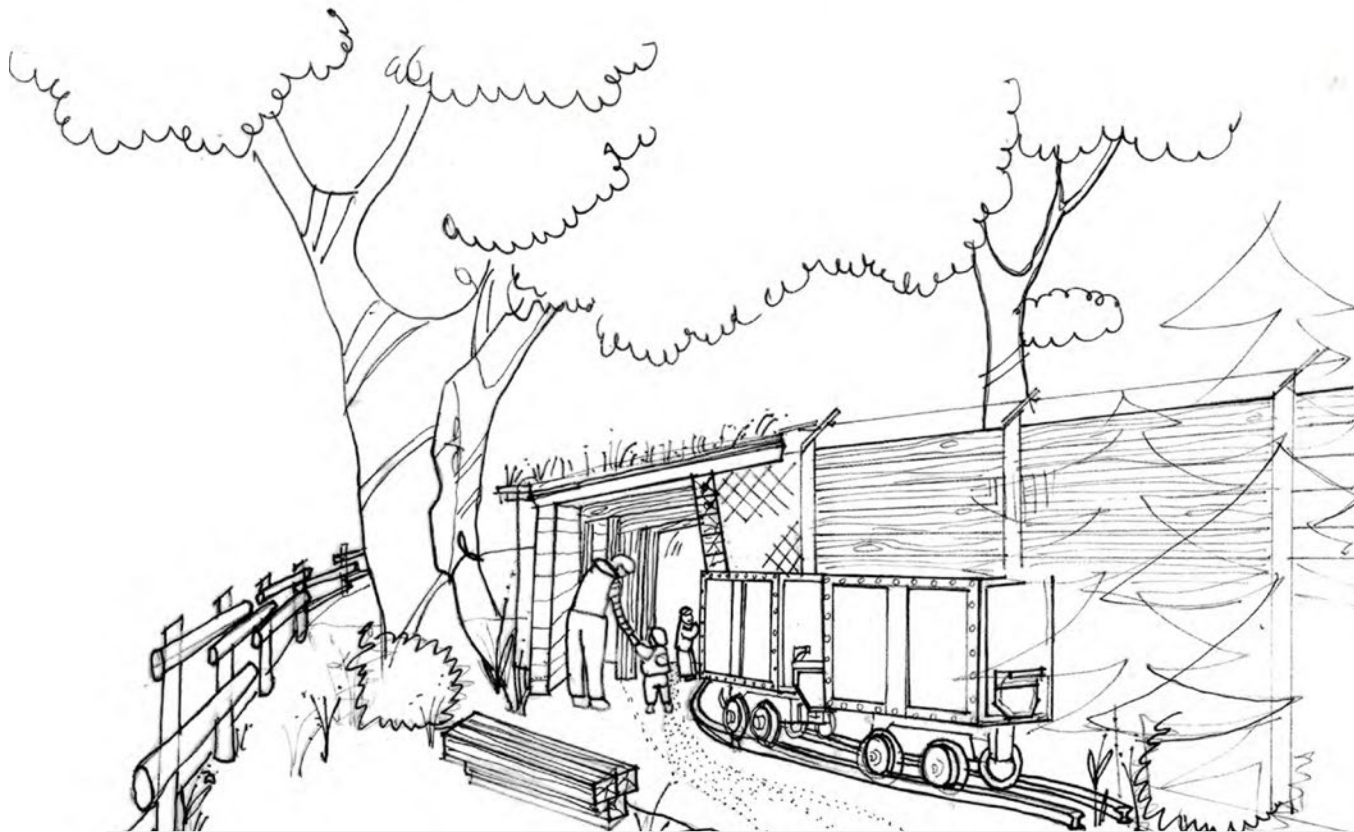

View Shelter, cave and deck: Phase II

Ms. Kubikova, the director of the Zoo, contacted Zoo Design, Inc. to develop nearly 1.5 acre of secondary forest in the area of Zoo Jihlava to become european wolf habitat, where wolves would be free to express their natural behavior and visitors will be engaged in discovering wolf agency.

The design process includes research of leading wolf facilities, zoos and sanctuaries, in US and EU and development of an environmental enrichment plan for the species.

Visitor experience ties into the local historical mining culture.
