

Boreal Discovery Centre

Thompson Zoo, Manitoba, Canada

Total Area: 8 acres

Animal Area: 2.2 acres

Animals: Canadian Lynx, Woodland Caribou, Bald Eagle, Great Grey Owl

In an effort to revitalize the Zoo in Thompson, Zoo Design Inc worked with the zoo team to develop a master plan for the Boreal Discovery Center. This plan creates dynamic naturalistic habitats that engage both native and resident species, as well as visitors. The design works with local ecosystems to create a seamless connection inside and outside the exhibits. An aquarium follows the lives of sturgeon, a local fish, while the rest of the site supports local mammalian and raptor wildlife.
