

Land of Lemurs

Calagary Zoo, Alberta, Canada

Area: 1.5 acres

Animals: Lemurs

Budget: \$4.5 million

Concept Design

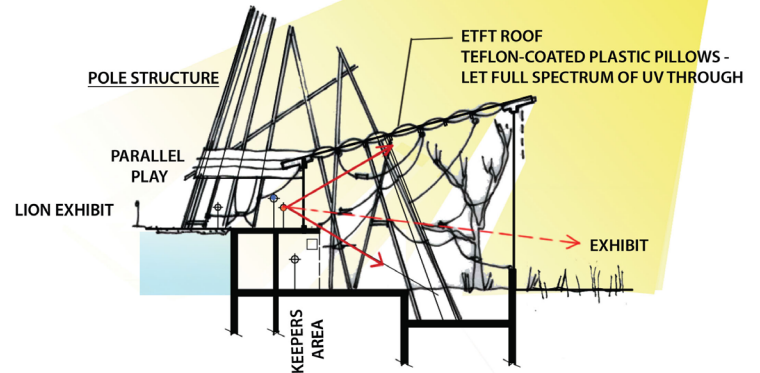

The Calgary Zoo, with the ambition of becoming the next leader in conservation, animal welfare and immersive guest experience, engaged Zoo Design Inc to establish their next goal. A conceptual design was developed for 1.5 acres of native lowland forest to become lemur habitat. The project includes a 2700sq.ft. holding building, 720ft. perimeter boardwalk walk and 160ft. of walk-through Lemur exhibit experience. This exhibit is to be the first fully immersive lemur exhibit in North America.

Lemur in Calgary
